Harris Calorific International sp.z o.o. will invest

The American company Harris Calorific International sp.z o.o. will once again invest in the DzierÅ¼oniÃ³w subzone! On November 19, the company obtained a decision to support investments as part of the government program Polish Investment Zone.

The new investment will consist in increasing the production capacity of the existing enterprise in the field of flux cored wire production by acquiring an innovative production line for their production along with the modernization of the existing infrastructure. The value of the project is PLN 29 million. In connection with the

implementation of the new investment, the company plans to increase employment by at least 10 new jobs.

Harris Calorific International sp.z o.o. has been operating in DzierÅ¼oniÃ³w since 2006. It is a manufacturer of equipment for gas cutting, welding and regulators. The plant also produces flux cored wires. In 2011 the company was expanded with new production halls in which coated electrodes are produced.
