Improving occupational health and safety -

Application deadline:
February 26, 2024 - March 27, 2024

he Social Insurance Institution invites entrepreneurs to participate in a competition for projects related to maintaining the ability to work throughout the entire period of professional activity, implemented in 2025. The competition is announced as part of the Contribution Payer Co-financing Program.

Deadline for submitting applications for funding: February 26, 2024 - March 27, 2024.

The aim of the Competition is to select projects that will concern:

- improving occupational health and safety,
- reducing the risk of accidents at work or occupational diseases,
- reducing the adverse impact of risk factors.

Activities that fall within the following technical areas are eligible for co-financing:

- safety of technical installations, machines, devices and workplaces;
- devices protecting against noise, mechanical vibrations and electromagnetic radiation;
- lighting of places and workstations and protection against optical radiation;
- protection against electricity and static electricity;
- air purifying and conditioning devices, mechanical air ventilation devices;
- equipment and devices to improve work safety at heights, in hollows and other work zones;
- equipment and devices to reduce the load on the musculoskeletal system;
- equipment and devices to improve occupational safety in the event of exposure to chemical and harmful biological agents;
- personal protection.
