Forklifts - a problem in every production company

The WaÅ?brzych Special Economic Zone "INVEST-PARK" together with the Sendero Tax & Legal Law Firm invites you to a webinar: Forklift trucks - a problem in every manufacturing company, which will be held on February 27, 2024, from 10:00 a.m. to 11:30 a.m.

Nowadays, it is difficult to imagine a manufacturing company, store or warehouse without forklifts. Their diversity and functionality are invaluable. However, apart from making work much easier, these vehicles may cause legal and organizational problems. During the webinar, selected practical issues regarding strollers and important issues related to their use will be discussed.

Agenda

- Types of forklift trucks
- Which strollers are subject to UDT regulations?
- Technical condition of the vehicle and preparation of the employee
- Changes in regulations
- Forklifts in the company. How to organize it?
- Safety instructions for transport work

The meeting will be led by:

Filip Firut - legal advisor, specializes primarily in issues related to labor law and personal data protection. He supervises audits and conducts implementation processes of labor law and GDPR procedures. His work mainly involves comprehensive support for HR departments in large enterprises. Often, preparing an appropriate strategy for a client goes beyond just knowing the law. Therefore, in his daily work, the method of communication with the client and the client with his employees is very important to him.
