

Industrial Development Agency is preparing to launch a new grant project called "Dig.IT. Digital transformation of Polish SMEs". Thanks to support from the European Funds for a Modern Economy program for 2021-2027, the Dig.IT Project will become an extremely valuable tool for Polish entrepreneurs.

- Minimum grant value: EUR 40,000
- Maximum grant value: EUR 200,000
- Maximum level of funding: 70% of the net project cost

3 pillars of the Dig.IT project - Your path to digital transformation

1. **Consulting:** An experienced team of experts will help your company identify and use its digital potential. It will provide professional advice to develop a personalized digital strategy, tailored to the specifics of your company and industry.
2. **Grants to finance transformation:** Thanks to the Dig.IT project, you have a chance to receive grants that will enable you to finance the digital transformation process of your enterprise. The grants cover the purchase of modern digital technologies, fixed assets and employee training. This is an excellent opportunity to introduce product, process or organizational innovations that will accelerate the development of your business.
3. **Promotion and dissemination of the idea of â??â??digital transformation:** The Dig.IT project not only promotes the idea of â??â??digital transformation and its impact on the competitiveness of enterprises, but also aims to improve the knowledge and skills of SME sector employees in this area.
