Green energy from green sources â?? how to

The WaÅ?brzych Special Economic Zone "INVEST-PARK", together with INNPACT, the DomaÅ?ski Zakrzewski Palinka Law Firm and ZPUE, invites you to a webinar entitled "Green energy from green sources - how to effectively produce and store energy."

Date: April 17, 2024 from 10:00 a.m. to 12:00 p.m.

The situation on the energy market in Poland and Europe, especially the European Union's plans for the Green Deal and striving for climate neutrality, triggers enterprises to think about investments aimed at improving energy efficiency, but also at reducing greenhouse gas emissions. These investments include primarily the

construction of our own green energy source, such as photovoltaic or wind systems, which significantly reduce greenhouse gas emissions. Unfortunately, renewable energy solutions are characterized by instability of energy production because they depend on the forces of nature. However, this problem is complemented by energy storage.

Agenda

- "Current situation on the energy market" - Bogdan Plata, President of the Management Board of INNPACT sp. z o.o. (40 min.)
- "How to wisely and safely carry out the investment of building a PV system" - Grzegorz Lewandowski, Key Account Director of INNPACT sp. z o.o. (20 min.)
- "Changes in the amendment to the Spatial Planning and Development Act" - MaÅ?gorzata WÄ?Å¼yk, Senior Associate DZP sp. k. (20 min.)
- "Energy storage - technology review and possible solutions" - BÅ?aÅ¼ej Fidrocki, Energy Storage Sales Manager at ZPUE S.A. (40 min.)
