EENergy grants for SMEs! 10,000 to be won, euro

Are you thinking about reducing energy consumption in your company? Take the opportunity to improve energy efficiency as part of the EENergy project for SMEs that want to implement actions to reduce energy consumption and therefore their carbon footprint. A total of 900 companies from across the EU can count on a non-refundable grant of EUR 10,000.

Application deadline: May 15, 2024

The aim of the grant is to improve the energy efficiency of the enterprise (including buildings, processes and production lines) by 5 percent (measured by 5% energy

reduction in KWh) by:

- training,
- consulting (e.g. technical consultations, energy audits),
- or investments (e.g. energy certificates, installations of renewable energy systems).

Who can apply for funding?

Any company that meets the criteria of a European SME (according to the EU definition of an SME), operates on the market and was established before January 1, 2023, and demonstrates the ability to implement planned energy efficiency measures at the operational and technical level is eligible for funding. Applications from companies operating in energy-intensive industries are welcome.

Grants are 100 percent funded and non-refundable.
