

We continue our efforts to promote entrepreneurship, economic education and the development of future-ready skills. Another result of our cooperation will be a conference taking place on 19 November 2026 as part of Global Entrepreneurship Week. We invite you to join us for this special event!

As part of our ongoing activities supporting economic education and entrepreneurship, an organizational meeting was held on 29 September 2026 to prepare for the November conference. Representatives of institutions, organizations,

the financial sector and the local business community took part in the meeting.

The meeting provided an opportunity to review our cooperation to date, exchange experiences and discuss further initiatives that could address the needs of residents, young people and local entrepreneurs.

One of the outcomes of these discussions will be a conference providing a space for the exchange of knowledge, experience and good practices, as well as discussion about the challenges facing modern entrepreneurship and economic education.

During the conference, we plan to address topics including economic education, skills needed in the labour market and entrepreneurship. Another important area will be financial health – conscious money management, responsible financial decision-making and building economic security.

We want the conference to be not only a summary of our activities to date, but above all an inspiration for further initiatives and continued cooperation.

Participants of the meeting

The meeting was attended by:
